AT A GLANCE

- **West MPR**
- **Crocker Culinary Arts**
- **Crocker MPR & Administration Building**

Exciting developments are underway at West Elementary School where the construction of the new Multi-Purpose Room (MPR) is currently in progress.

Contractors have been diligently working on completing underground utility tie-ins and grading the site. In construction, grading involves shaping and leveling the ground to create a stable, even surface for the building while ensuring proper drainage throughout the area.

With the groundwork is nearing completion, contractors are now outlining the building footings, which will serve as the foundation for the new MPR structure, as illustrated in the photo above.

The District eagerly anticipates continued advancements on this significant project, which will provide students and staff with a modern, functional space for assemblies, performances, and community events.

Crocker Middle School Updates!

Culinary Arts, MPR & Administration Building

Culinary Arts Project:

This project consisted of transform of thing the previous staff work room into the New Culinary Arts Space! Phase I is now complete! Contractors worked on removing previously fixed items such as cabinets, work stations, and flooring. They added new drywall and paint, providing a new brighter Culinary Arts Space. Installation of new electrical outlets, new sinks with hot water, new refrigerator and new furnishings brought the Culinary Arts space to life!

Phase II will commence in summer 2026, which includes adding storage, relocating the sink and providing new casework, floor installation, and adding additional furnishings to complete the dining room.

Multi-Purpose Room and Administration Building:

Designers are currently awaiting feedback from the Division of the State Architect (DSA) on the submitted project plans. The DSA review ensures that all designs meet the required safety and accessibility standards for California schools. Once DSA approval is received, the project team will move forward with final preparations for construction, which is anticipated to begin in summer 2026. We look forward to sharing more updates as the project moves closer to the construction phase.
