Measure H

STAY IN THE LOOP WITH UPDATES AND ANNOUNCEMENTS!

AT A GLANCE

- **Welcome New CBOC Members!**
- **West Construction Updates**
- **Crocker Construction Updates & More!**

Welcome NEW CBOC MEMBERS!

The District is pleased to welcome Deb Kelly and Lori Williams as the newest members of the Citizens' Bond Oversight Committee (CBOC) for Measure H.

Deb and Lori bring valuable experience and community insight to the committee, which plays a vital role in ensuring transparency and accountability in the use of Measure H bond funds. These funds support critical improvements across our schools — enhancing safety, upgrading facilities, and creating better learning environments for students.

Recently our CBOC Members toured all campuses to see the new updates of each site! Pictured are all CBOC members at West. We're grateful for their commitment to serving our community and helping oversee the continued success of Measure H projects.

COMMITTEE RESPONSIBILITIES

Oversight Committee shall:

- Inform the public concerning the District's expenditure of the GO bond proceeds;
- Review expenditure reports produced by the District to ensure that the bond proceeds were expended only for the purposes set forth;
- Present to the Board in public session, an annual written report outlining their activities and conclusions regarding the expenditure of both bond proceeds.

West School Construction Updates

Construction is Underway!

Exciting developments are underway at West Elementary School, where the construction of the new Multi-Purpose Room (MPR) is currently in progress.

Contractors have been diligently working on completing underground utility tie-ins and grading the site. In construction, grading involves shaping and leveling the ground to create a stable, even surface for the building while ensuring proper drainage throughout the area.

With the groundwork nearing completion, contractors are now outlining the building footings, which will serve as the foundation for the new MPR structure, as illustrated in the photo below.

The District eagerly anticipates continued advancements on this significant project, which will provide students and staff with a modern, functional space for assemblies, performances, and community events.

If you are interested in receiving regular project updates and would like to be added to our West School Communication Distribution List, please call the HCSO District Office at 650-342-5193 or [CLICK on this LINK](#) to access a form to complete online or scan the QR Code!

Crocker Middle School Projects

Culinary Arts & Waterline Relocation

Work ROOM

Culinary ARTS

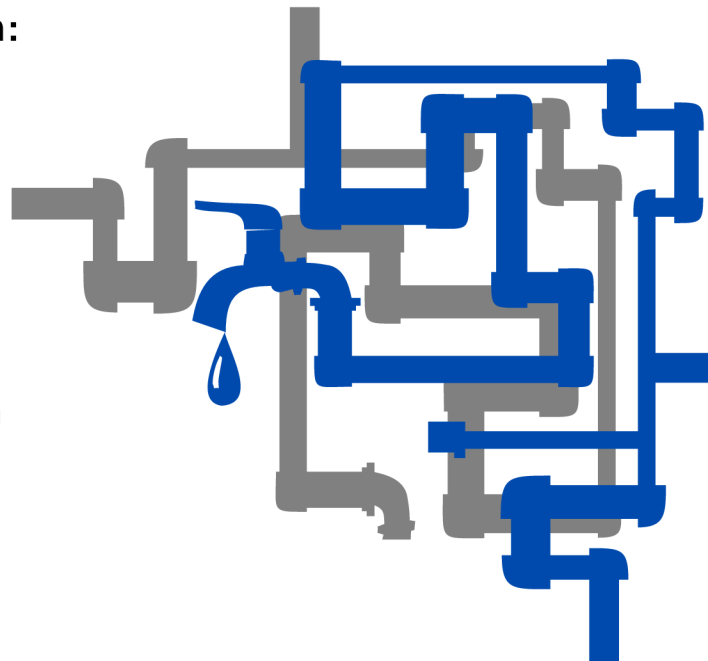

Culinary Arts Project at Crocker:

This project consisted of the transformation of the previous staff work room into the New Culinary Arts Space! Phase I is now complete! Contractors worked on removing previously fixed items such as cabinets, work stations, and flooring. They added new drywall and paint, providing a new brighter Culinary Arts Space. Installation of new electrical outlets, new sinks with hot water, new refrigerator and new furnishings brought the Culinary Arts space to life!

Phase II will commence in Summer 2026, which includes adding storage, relocating the sink and providing new casework, floor installation, and adding additional furnishings to complete the dining room.

Town of Hillsborough Waterline Relocation:

Contractors worked throughout the summer to quickly relocate a waterline that went through the Crocker campus that fed water to the Town of Hillsborough. All trenches that were made have been backfilled. Now the new waterline has been relocated and is actively working! It's been a pleasure working closely with the Town of Hillsborough on this project!

South School Construction Updates

NEW HVAC Units, Roofing and Fire Alarms!

Facility Upgrades at South!

We are thrilled to share that South School received some major upgrades over the summer to make our building safer, more efficient, and more comfortable for students and staff.

- **New HVAC Units** - The new heating, ventilation, and air conditioning systems have been installed throughout the school. These units will provide more consistent temperatures in every classroom and improve air quality, creating a healthier and more comfortable learning environment.
- **New Roofs** - South received brand new roofing on all buildings. This important upgrade will protect classrooms from the elements, improve insulation, and extend the life of our school facility.
- **Upgraded Fire Alarms** - Safety is always a top priority! South School now has a modern fire alarm system, ensuring quicker alerts, improved monitoring, and greater protection for our entire school community.

Contractor and consultants are working closely together to tie up loose ends and complete these projects at South!
